Poorly Characterized
Energy Metabolism
Translation
Cellular Processes and Signaling
Metabolism of Cofactors and Vitamins
Nucleotide Metabolism
Endocrine System
Transport and Catabolism
Environmental Adaptation
Signaling Molecules and Interaction
Circulatory System
Cardiovascular Diseases
Cell Communication
Sensory System
Immune System Diseases
Digestive System
Excretory System
Neurodegenerative Diseases
Immune System
Cancers
Metabolic Diseases
Nervous System
Biosynthesis of Other Secondary Metabolites
Cell Growth and Death
Infectious Diseases
Transcription
Metabolism
Genetic Information Processing
Lipid Metabolism
Cell Motility
Folding, Sorting and Degradation
Enzyme Families
Glycan Biosynthesis and Metabolism
Metabolism of Other Amino Acids
Metabolism of Terpenoids and Polyketides
Signal Transduction
Xenobiotics Biodegradation and Metabolism
Membrane Transport
Carbohydrate Metabolism
Amino Acid Metabolism
Replication and Repair
